

Rebecca

NEW COLLECTION 2008

MELROSE COLLECTION The collection draws its inspiration from the intertwined lines which create a manifold diamond-shaped pattern. The contrast between full volumes and empty intersection spaces has an effect of extreme brightness thus enhancing the design and giving jewels dynamism. The materials and shades of colours are classics from Rebecca universe: yellow gold coated bronze, rose gold coated bronze and rhodium plated silver. Part of the collection is framed around the play of white and pink nuances. The necklace links, bracelets and earrings are characterised by a blend of steel with rose gold plated bronze. The maxi-rings feature oversized collets.

This collection is characterised by a line of jewels designed to praise men's universe, featuring the use of rhodium plated silver matching natural diamonds and black rubber strings.

NEW YORKER

The use of colourful gemstones characterising the Rebecca jewellery and the timeless charm of bevelled shapes merge in this collection featuring sophisticated women's jewels. The New Yorker collection, with its extremely contemporary touch, comprises a wide array of jewels lit up by colourful gemstones matching yellow or rose sand gold coated bronze and rhodium plated silver. The double cabochon cuts give birth to amazing colour effects highlighting their smooth and sinuous shapes.

TROPEZIENNE

This must-have collection in Rebecca universe, still consistent with its own style, has evolved itself into new elegance, starting its research around a basic element of this set of jewels: circular links. The size has been magnified thus making it the core of a line featuring necklaces, bracelets and earrings.

For the very first time, the ~~Tropezienne~~ collection grades into some rhodium plated silver shades.

Dimensions are new. The traditional maxi-collets match long and thin chains whereas the bracelets are enriched with a new three-string version.

MON AMOUR

The Mon Amour collection stands out thanks to its spherical colourful double collet pendant. Details represent the core of this collection, i.e. circular link and the bronze button engraved with "Mon Amour Rebecca". All bronze jewels have new shades of colour: yellow, rose, white gold and ruthenium.

GOLD 18 KT

For the very first time, 18-carat gold enters the universe of Rebecca collections. The traditional shapes characterising the Tropezienne collection and the contemporary lines of the New Yorker collection are blended with the material that has always been a byword for preciousness. A new Rebecca code has been created: design – precious – contemporary.
